#### Brainstorm & Idea Prioritization Template:

Our idea is to implement an automated student support ticketing system. The core problem is that students experience delays in getting IT and academic support, affecting their learning experience. Using ServiceNow, we aim to centralize and automate the handling of support requests. This solution is expected to have a high impact on student satisfaction and operational efficiency. The feasibility is moderate, as it builds on existing infrastructure with manageable setup requirements. Based on impact and feasibility, we prioritize this idea as high, with an overall score of 8 out of 10.
